

**Quadsys** are a leading supplier of security software, anti-virus products, hardware, infrastructure and their associated services

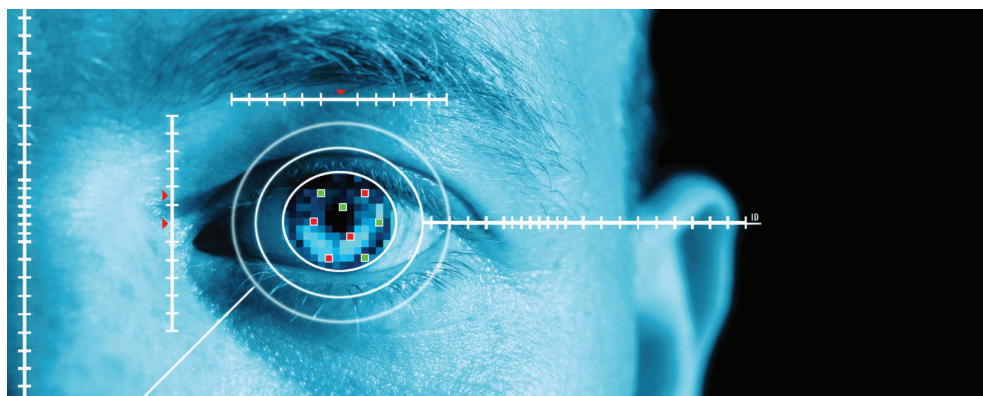

**Quadsys Limited** have a national presence in both the public and private sector, providing products and services throughout the UK & Europe. Our highly trained service team means our customers can focus on the things that matter and leave the IT to us.

## Who we are

Quadsys was established in 2008 as an experienced IT reseller and consultancy. We are a leading supplier of security software, anti-virus products, hardware, infrastructure and their associated services. We focus on the provisioning of tailored business solutions and we're widely recognised as a key ICT Partner for a comprehensive range of IT security and Infrastructure solutions.

Quadsys highly trained employees have over 30 years of experience within the industry and our clients range from the SMB market all the way up to Enterprise and large multi-national organisations, throughout the UK and Europe covering all verticals; with specialisations in the Healthcare, Education and Public sector.

## What we can offer

Quadsys deal with only Top Tier Vendors & Manufacturers within the industry, from the core selling of Hardware & Software Licenses, to the design, implementation and documentation of SMB to large scale projects involving Cisco, Citrix, DELL, HP, IBM, Kaspersky, Lenovo, McAfee, Microsoft, Ruckus, Sophos, Symantec, VMware, and many more.

Networks are the backbone of any business. Failure can be highly disruptive to daily operations and therefore to profitability. We work with a number of top tier Hardware vendors like Cisco, DELL, HP, and Lenovo etc... to bring you an array of products to maximise efficiency on the network; servers to laptops, racks to desktops, for a more productive organisation.

Quadsys can provide competitive pricing and offer installation and consultancy services on all of our offerings.

## Professional Services

Our consultants have been working in the field with all McAfee, Sophos, and Symantec software components among others for many years, including centralised management, Endpoint Security, HIPS, Device Control and Endpoint Encryption.

We've implemented and supported these solutions for many Government and Private organisations.
